TIME: DECEMBER 10, 8AM TO 2PM

### WHY NON-PROFIT?

Many people mistakenly think Non Profit Businesses aren't suppose to make a profit. These people need to realize that the point of any business is to make a profit! The difference in a "For Profit" and "Not For Profit" business is what they must do with the profit.

A "Not For Profit" business is formed for a specific purpose called a "mission," and all profit must be used to carry out that mission, whereas a "For Profit" business is formed to make a profit to be distributed among the owners of the business.

The profit of a "Not for Profit" business is not taxable, whereas the profit of a "For Profit" business is taxable. Maggie's Corner formed for one specific purpose, or "mission" which is **"To promote sustainability of natural resources by providing education and training programs that utilize reclaimed materials that are then upcycled into useful items that will become a revenue source for our charitable and sponsorship values."**
